

Medical Reports of Dr. Ralph Michael Kelly

The Trustees of the NGC Bodily Injury Trust adopted a policy in January 2009 to deny acceptance of a medical diagnosis or any other medical evidence from Dr. Ralph Michael Kelly. Thus medical deficiencies have been cited for claims relying on a medical diagnosis or report originated by Dr. Ralph Michael Kelly since that date.

However, the Trustees have recently considered information causing a re-review of the policy. The Trustees have determined that a claim filed before July 1, 2009 that relies on a medical report by Dr. Ralph Michael Kelly is now acceptable.
